PROFESSIONAL SUMMARY

Full-stack developer with 5+ years in SaaS and enterprise application support, recently completed the _nology software engineering program (Feb 2026). Builds with React, TypeScript, Java, and Spring Boot, with hands-on AWS deployment. Recent work includes a job management platform with an integrated AI assistant (MCP tooling) deployed to AWS, a secured REST API with JWT and CSRF authentication, and a deployed e-commerce app with Stripe and Firebase. Five years across Salesforce, HubSpot, Oracle, SAP, and Infor M3 inform a practical sense of how software behaves in production, not just whether it compiles. Available immediately. Australian Citizen.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, PHP

Frontend: React, HTML, CSS/SCSS, Tailwind CSS

Backend: Spring Boot, Node.js, Express, REST APIs

Databases: MySQL, Firestore (Firebase)

Cloud & DevOps: AWS (Elastic Beanstalk, RDS, Amplify, Route 53), Render, Docker

Tools: Git, GitHub, JUnit, Jest, Postman, Figma

Platforms & CMS: Salesforce, HubSpot, SAP, Oracle ERP, Infor M3, WordPress

PROJECT EXPERIENCE

Jobs Platform — Full-Stack System with AI Assistant 2026

React · TypeScript · Spring Boot · MySQL · MCP · JWT · CSRF · AWS — jobs.dinaratiumina.com

- Designed and built a multi-service job management platform with secure workflows and real-world business rules
- Built a Spring Boot REST API with layered architecture, JWT authentication in HTTP-only cookies, and CSRF protection
- Developed a React + TypeScript frontend with filtering, sorting, pagination, and structured error handling
- Integrated an MCP-based AI assistant that executes tool actions via natural language with confirmation flows
- Deployed the full platform to AWS — Spring Boot API on Elastic Beanstalk, MySQL on RDS, React frontend on Amplify, custom domain via Route 53 — and operate it as a live production application

TaskFlow — Team Task Management Platform (Full-Stack) 2026

React · TypeScript · Spring Boot · MySQL · JWT

- Built a multi-tenant team task platform with teams, role-based memberships, team-scoped projects, tasks, categories, and comments
- Implemented JWT authentication, a validation-first service layer, activity logging for audit trails, and paginated/filtered task querying
- Structured the backend into clear domain boundaries (auth, teams, projects, tasks, comments, activity) as a foundation for service decomposition

Pawsonality Gear — E-commerce Application 2025

React · Vite · Firebase · Stripe · Express · Render — dinara-t.github.io/Pawsonality-Gear

- Built a full-stack e-commerce app with Stripe Checkout, variant-based inventory, and persistent cart state
 - Designed a Firestore database structure with transactional stock updates and real-time inventory accuracy
 - Deployed the React frontend to GitHub Pages and the Express/Stripe checkout backend to Render
-

PROFESSIONAL EXPERIENCE

Software Developer Trainee • _nology *Nov 2025 – Feb 2026*

- Completed an intensive, industry-led software engineering program covering full-stack development, TDD, REST API design, and agile practices
- Built a full-stack job management platform with an integrated AI assistant (MCP tooling), a secured Spring Boot API with JWT and CSRF authentication, and an e-commerce app with Stripe and Firebase
- Technologies: React, TypeScript, Java, Spring Boot, MySQL, Firebase, Git, JUnit, Jest, Docker

Reconciliations Officer – Client Success • Good2Give *2022 – 2025*

- Delivered SaaS platform support, resolving technical issues and system errors for a high-volume user base
- Investigated and reproduced issues, escalated bugs to engineering, and tracked them through to resolution
- Managed support workflows using Salesforce and HubSpot ticketing systems
- Improved operational processes, reducing reconciliation errors and support backlog

Administrative Assistant (ERP & Data Support) • A. Raptis & Sons *2018 – 2021*

- Managed ERP-based processes including invoicing and reconciliation using Infor M3
- Improved reporting efficiency through structured templates and documentation

Flight Attendant • Aeroflot *2014 – 2018*

- Delivered high-volume customer service in a regulated, safety-critical environment

SAP Support Officer • TB INFORM *2013 – 2014*

- Provided Level 2 support for SAP systems, resolving user and workflow issues
- Created documentation to improve support efficiency and reduce repeat issues

ERP Support Administrator • Rostelecom *2012 – 2013*

- Supported Oracle ERP users including onboarding and reporting
- Improved system adoption through user guidance and process improvements

EDUCATION & CERTIFICATIONS

- _nology — Full Stack Software Development Program (2026)
- IBM Front-End Developer Certification — Coursera (2025)
- Master of Information Technology (Interactive Media) — University of Technology Sydney (2021)
- Bachelor of Applied Information Systems — Saratov State Technical University (2012)
