About

Full-stack developer with 5+ years in SaaS and enterprise systems, graduated from the _nology software engineering program (2026). I build with React, TypeScript, Java, and Spring Boot — including a full-stack job management platform with an integrated AI assistant built on MCP tooling, a secured REST API with JWT and CSRF authentication, and an e-commerce app with Stripe and Firebase.

Before moving into development I spent five years in SaaS customer success and application support across Salesforce, HubSpot, Oracle, SAP, and Infor M3. That background shaped how I think about software — I care about how systems behave under real conditions, not just whether the code compiles.

Open to junior developer and implementation/consulting roles in Sydney, Central Coast, or remote. Australian Citizen. Available immediately.

Technical Skills

Languages: Java, JavaScript, TypeScript
Frontend: React, HTML, CSS/SCSS
Backend: Spring Boot, Node.js, Express, REST APIs
Databases: MySQL, Firestore (Firebase)
Cloud: AWS (Elastic Beanstalk, RDS, Amplify, Route 53)
Tools: Git, GitHub, Docker, JUnit, Jest, Postman, Figma
Platforms: Salesforce, HubSpot, SAP, Oracle ERP, Infor M3

Project Experience

Jobs Platform — Full-Stack System with AI Assistant 2026

React · TypeScript · Spring Boot · MySQL · MCP · JWT · CSRF · AWS — Live: jobs.dinaratiumina.com

- Designed and built a multi-service job management platform with secure workflows and real-world business rules
- Built a Spring Boot REST API with layered architecture, JWT authentication in HTTP-only cookies, and CSRF protection
- Developed React + TypeScript frontend with filtering, sorting, pagination, and structured error handling
- Integrated an MCP-based AI assistant capable of executing tool actions via natural language with confirmation flows
- Deployed the full platform to AWS — Spring Boot API on Elastic Beanstalk, MySQL on RDS, React frontend on Amplify, custom domain via Route 53 — and operate it as a live production application

TaskFlow — Team Task Management Platform (Full-Stack) · 2026

React · TypeScript · Spring Boot · MySQL · JWT

- Built a multi-tenant team task platform with teams, role-based memberships, team-scoped projects, tasks, categories, and comments
- Implemented JWT authentication, validation-first service layer, activity logging for audit trails, and paginated/filtered task querying
- Structured the backend into clear domain boundaries (auth, teams, projects, tasks, comments, activity) as a foundation for service decomposition

Pawsonality Gear — E-commerce Application 2025

React · Vite · Firebase · Stripe · Express — Live: dinara-t.github.io/Pawsonality-Gear

- Built full-stack e-commerce app with Stripe Checkout, variant-based inventory, and persistent cart state
- Designed Firestore database structure with transactional stock updates and real-time inventory accuracy

Professional Experience

Software Developer Trainee

Nov 2025 – Present

_nology

- Completed an intensive industry-led software engineering program covering full-stack development, TDD, REST API design, and agile practices
- Built a full-stack job management platform with an integrated AI assistant (MCP tooling), a secured Spring Boot API with JWT and CSRF authentication, and an e-commerce app with Stripe and Firebase
- Technologies: React, TypeScript, Java, Spring Boot, MySQL, Firebase, Git, JUnit, Jest, Docker

Reconciliations Officer – Client Success

2022 – 2025

Good2Give

- Delivered SaaS platform support, resolving technical issues and system errors for a high-volume user base
- Investigated bugs and worked with engineering teams to escalate and resolve issues
- Managed support workflows using Salesforce and HubSpot ticketing systems
- Improved operational processes, reducing reconciliation errors and support backlog

Administrative Assistant (ERP & Data Support)

2018 – 2021

A. Raptis & Sons

- Managed ERP-based processes including invoicing and reconciliation using Infor M3
- Improved reporting efficiency through structured templates and documentation

Flight Attendant

2014 – 2018

Aeroflot

- Delivered high-volume customer service in a regulated, safety-critical environment

SAP Support Officer

2013 – 2014

TB INFORM

- Provided Level 2 support for SAP systems, resolving user and workflow issues
- Created documentation to improve support efficiency and reduce repeat issues

ERP Support Administrator

2012 – 2013

Rostelecom

- Supported Oracle ERP users including onboarding and reporting
- Improved system adoption through user guidance and process improvements

Education & Certifications

_nology — Full Stack Software Development Program (2026)

IBM Front-End Developer Certification — Coursera (2025)

Master of Information Technology (Interactive Media) — University of Technology Sydney (2021)

Bachelor of Applied Information Systems — Saratov State Technical University (2012)
