Project Experience

Jobs Platform — Full-Stack System with AI Assistant

- Designed and developed a multi-service job management platform for assigning temporary workers, incorporating real-world business rules and secure workflows
- Built a REST API using Spring Boot and MySQL with layered architecture, validation, pagination, and relational data modelling
- Implemented secure authentication using JWT stored in HTTP-only cookies with CSRF protection for state-changing operations
- Developed a React + TypeScript frontend with filtering, sorting, and API integration using structured error handling
- Designed and integrated an MCP-based AI assistant capable of executing tool-based actions (e.g. assigning workers to jobs) via natural language with confirmation flows

Todo Application — Full-Stack

- Designed and built a full-stack task management application with a layered backend architecture (controller, service, repository)
- Developed RESTful API using Spring Boot and MySQL with support for filtering, sorting, and soft-delete functionality
- Implemented authentication and secure endpoints using JWT and role-based access
- Built React + TypeScript frontend consuming backend APIs with dynamic state handling

Pawsonality Gear — Full-Stack E-commerce Application

- Built a full-stack e-commerce application with product catalogue, variant-based inventory, and Stripe Checkout integration
- Implemented React state management with persistent cart functionality and dynamic product handling
- Designed Firestore database structure and handled stock consistency using transactional updates
- Integrated frontend and backend services, ensuring reliable data flow and real-time inventory accuracy

Professional summary

Full-stack application development experience building modern web applications, backed by over 5 years of experience in SaaS customer support and application systems. Recently completed an intensive software development program through _nology, strengthening practical skills in designing, building, and troubleshooting applications.

Strong understanding of how software behaves in real-world environments, with experience working alongside engineering teams to resolve issues and improve system performance. Combines technical development skills with a user-focused mindset and strong problem-solving ability.

Technical Skills

Languages: Java, JavaScript, TypeScript

Frontend: React, HTML, CSS/SCSS

Backend: Spring Boot, Node.js, Express

Databases: MySQL, Firestore

Tools: Git, REST APIs, JUnit, Jest

Professional Experience

Reconciliations Officer – Client Success

Good2Give | 2022 – 2025

- Delivered SaaS platform support, resolving technical issues and system errors for a high-volume user base
- Investigated bugs and worked with engineering teams to escalate and resolve issues
- Managed support workflows using Salesforce and HubSpot ticketing systems
- Improved operational processes, reducing reconciliation errors and support backlog

Administrative Assistant (ERP & Data Support)

A. Raptis & Sons | 2018 – 2021

- Managed ERP-based processes including invoicing and reconciliation using Infor m3
- Improved reporting efficiency through structured templates and documentation

SAP Support Officer

TB INFORM | 2013 – 2014

- Provided Level 2 support for SAP systems, resolving user and workflow issues
- Created documentation to improve support efficiency and reduce repeat issues

ERP Support Administrator

Rostelecom | 2012 – 2013

- Supported Oracle ERP users, including onboarding and reporting
- Improved system adoption through user guidance and process improvements

Education

**_nology — Full Stack
Software Development
Program | 2026**

**IBM Front-End Developer
Certification (Coursera) |
2025**

**Master of Information
Technology (Interactive
Media)**

University of Technology
Sydney | 2021

**Bachelor of Applied
Information Systems**
Saratov State Technical
University | 2012
